BRIEF DESCRIPTION

A distinctive feature of the program lies in the combination of two industries - oil and gas business and power engineering, so that the student first considers the main areas of oil and gas development, as well as their relationship with each other, studies in depth the issues of modelling geological processes and modern methods of exploration for oil and gas, and then goes on to the design of power equipment. Thanks to the program, students will be able to gain teamwork skills, learn to make optimal decisions in a short time, discover new areas of technical progress, and work on what is of greatest interest to them in terms of professional growth.

The purpose of the program is to study the main directions and technological operations in exploration, drilling, production, primary processing, transportation and processing of oil and gas, as well as to get the basics of the development and operation of power equipment for gas transmission systems.

Cost:

On-line: US\$512

On-campus: US\$735

Includes tuition, registration, 4 credits ECTS Certificate, Migration support (for on-campus course), virtual Russian language course by ALAR Training Center (33h) + Certificate

Program dates:

On-line: July 17 – 28, 2023

On-campus: July 17 – 28, 2023

Registration deadline:

On-line: July 5, 2023

On-campus: May 31, 2023

Entrance requirements:

- Fluent English. All classes and extracurricular activities are carried out in English. Knowledge of the Russian language is not required;
- The course is opened for Russian and foreign Bachelor, Master and PhD students with specialized background in Petroleum and Gas Engineering or equivalent skills and knowledge.

WHY US?

We never stop developing. It is not our first rodeo! Our team is committed to learn and analyze every possible aspect of our course. Our students are in good hands – we deliver our promises concerning educational programme and many other activities that are created by our amazing staff!
